- good source of nitrogen
- cover more area with less product compared to granular or powdered corn gluten

### Application Rate:

Apply at a rate of 1 L per 1,000 sq. feet or 43 L per acre.

### The TurfMaize™ Story

TurfMaize Liquid™ is Canadian made, processed from Canadian grown corn. TurfMaize Liquid Bio-fertilizer is truly a plant based wonder. The ingredients in the product are protein powered nutrients which gives applicators a sprayable plant based arsenal to fertilize and thicken lawns to crowd out weeds. Corn gluten is a by-product of starch production, a renewable and environmentally conscious resource.

Liquid corn gluten is treated with a proprietary mix of enzymes and concentrated for the ultimate corn gluten power.

Finally, a natural based product designed for professional use with all the benefits of corn gluten meal, in sprayable form.

Treat more properties, lower handling and product costs, equals money in the bank.

Reach more consumers with a natural, effective approach to lawn care.
