

# TURFMAIZE PRO™

## Corn Gluten Herbicide

Grown by nature...  
Engineered for performance.

### The Original Corn Gluten Herbicide

#### Features and Benefits:

- Chemical-free pre-emergent
- Inhibits Crabgrass & Dandelion seed germination
- Crumbled for even application
- Contains 98% Corn gluten meal, as tested and proven effective by Iowa State University

#### Application Rate:

Lawns: Spread 9.7 kg per 93m<sup>2</sup> ( 20 lbs. per 1000 sq.ft.) evenly by broadcast spreader. **For best results:** Apply to established turf twice per year; once in early Spring and once in late / summer / early fall.

#### TurfMaize™ Story

TurfMaize™ Pro Pre-emergent Corn Gluten Herbicide, is a 100% plant based pre-emergent, containing 98% corn gluten meal. TurfMaize is compatible with both organic and IPM programs. Corn gluten meal has been successfully researched for over a decade at Iowa State university. For further research information visit the Corn Gluten Meal Research Site at [www.gluten.iastate.edu](http://www.gluten.iastate.edu).

**Product Usage:** Residential and commercial landscapes, sport fields, school grounds, golf courses and municipal parks and greenspaces. Apply when soil is moist and when rain is forecasted within two days of treatment.
