

flea & chinch busters®

Biological flea, tick and chinch control.
Exclusive pet safe formula to rid your yard of
flea & tick larvae. Works other soil pests!

WHAT ARE THE NEMA-GLOBE NEMATODE INNOVATIONS

- 6+ months non-refrigerated shelf life compared to 4 – 12 weeks of existing formulations
- First time rain-fast “non-refrigerated” proprietary formulation
- New “zero” clog bio-pouch for easy application

ARE NEMATODES SAFE FOR NON TARGET ORGANISMS? YES

- Nematodes are Bee, Butterfly & Beneficial Safe
- Active ingredient contains no neonicotinoids insecticides (i.e. Imidacloprid)
- Safe for people, plants and pets

WHAT ARE SOME OF THE OTHER UNIQUE FEATURES:

- Nema-globe nematodes come in exclusive small foot print 3 inch “bio” based packaging globe
- No special handling, can be sold as regular case goods in warehouse program, saves on ice, insulated boxes and expensive courier charges
- Small shelf footprint compared to 20 lb. bags of product

WHEN TO APPLY* NEMA-GLOBE NEMATODES?

Nema-globe nematodes can be used any time the insect is in larval stage (i.e. in the soil). Typically temperatures need to be 50 °F - 90 °F for the nematodes to be able to enter into and kill a soil pest.

Grubs : Spring & Late Summer – early Fall

Fungus Gnats : Indoors – all year round

Flea & Tick : All year round in some regions

Ants: When adults are active, generally mid March to November

* Timing of application varies by geographic region.

HOW TO APPLY?

Hose end sprayer: You can use most common lawn and garden sprayers on the market. Simply add the bio-pouch containing the nematodes directly into the sprayer and add water to fill line.

Watering Can: For small areas you like a vegetable gardens you can apply with a watering can by dropping the bio-pouch into the sprayer, add water and mix well to release nematodes from the bio-pouch.
